Added:

- New warning messages when scan errors occured.
- New "image rotation" capability (you can rotate the graph as you want).
- New "text density" setting (you can change the text density in real time).
- New tooltip available when the mouse is hovered a directory.
- Count the number of files in a directory (see the "Directory Details" form).
- New commande line argument to set output image size.

Improved:

- Better resize mode (preview during resize, real redraw when resize finished)
- Asynchronous draw for complicated graphs (which take a long time to draw), to avoid application freeze.
- Main window state is memorized on exit (or the size if the window is not maximized).
- Performance improvements

Fixed:

- Bug 2505755 ("Wrong Image saved when run from CLI")
- Some minor bugs...
